- I think it is a good idea to put breakfast club on. This will help a lot with early morning childcare.
- I would find this very useful to working families. This would help keep cost down on private nursery usage. I also think it would be beneficial for the children attending a breakfast club before school. This would give me the opportunity to be able to bring my child to school myself before work.
- I could then possible see about swapping my shifts at work to start on a morning.
- Would help greatly with work hours.
- Brilliant idea as I work on a morning.

What could we do to improve further?

I would not require the service everyday, but it would be helpful when I am working. It would be more convenient for me if it could start at 7.45am for those parents that start at 8am.	Thank you for the feedback. I am pleased to state that we will aim to start breakfast club at 7.45.
I would not send my child every morning. I would only send once or twice a week. The cost of breakfast club seems to be a bit too high when other schools in the area charge a lot less than £2. The cost seems expensive when you have two children in school. It is a good idea but a bit expensive for 2 children.	Thank you for the feedback. The pupils will be offered a variety of cereals and toast, along with a drink of apple/orange juice, milk or water. Pupils will also be entertained during this time, and we need to ensure that we can afford to staff this as a school. We will try to access funding for a breakfast club (Greggs/Kellogs). However, due to funding cuts there is a long waiting list.
