

We are working with The Skills Builder Partnership to ensure our pupils have the opportunity to build eight essential skills in order to support them in their lives both now and in the future. Intensive research has shown that building these eight essential skills ensures that young people can be successful not only now, but also preparing them for their lives beyond school. The Skills Builder Partnership has a programme that breaks down these essential skills into smaller, teachable steps that can be taught at an appropriate level to the pupils.

The Skills Builder programme is currently delivered as a weekly session to pupils in years 2 to 6. Pupils are then encouraged to recognise when they are using these skills in other lessons and in their wider school life.
